## ESRI Australia Releases Dekho v2.1

23<sup>rd</sup> July 2008 - ESRI Australia today announced the release of Dekho v2.1. With improvements to existing functionality and a range of new extensions available, Dekho v2.1 enhances the user experience and delivers improved administration and additional security features.

New Dekho extensions available at v2.1 facilitate integration with:

- / Cognos 8
- / TechnologyOne Data Works and Property Rating systems
- / Trim Context
- / ArcFM Server

User improvements include public bookmarks, legend scalability and enhanced selection and review capabilities. Dekho administration and security is also strengthened through improved tool customisation capabilities, public key encryption for passwords and user specific layer masking.

For more information on Dekho v2.1 and how it can enable your organisation to become location intelligent, visit [www.esriaustralia.com.au/dekho](http://www.esriaustralia.com.au/dekho) or contact ESRI Australia on 1800 447 111.

**--ENDS--**

### **About Dekho**

Dekho utilises the geographic relationships within the information held by corporations or government agencies to seamlessly integrate unrelated data to enable smarter business decisions. Dekho can be used where there is a location related element to decision making such as asset management, dealing with customer enquiries, capture and synchronisation of customer information and planning and analysis activities.

Using free web browsers as the interface, Dekho delivers live, central data dissemination, ensuring that only accurate timely information is accessed to enable organisations to make the best decisions possible.

Dekho is centrally managed and can be controlled to limit data and functionality access ensuring a secure environment. The central management also enables customisation of the interface on an ongoing basis, and configuration of individual requirements such as standard queries, reports and print layouts.

Dekho is available through an easy-to-use interface designed for deployment via the Internet or through an intranet. Due to this deployment, Dekho can be easily accessed by employees, customers or the public.

### **About ESRI Australia**

ESRI Australia is the source of astute professional services and Geographic Information Systems (GIS) technology. An expert in location intelligence, ESRI Australia has over 30 years experience in implementing GIS solutions in dozens of different industries.
