Geoscience Australia signs enterprise licence agreement

Geoscience Australia (GA) has signed a three year enterprise licence agreement (ELA) with ESRI Australia, extending access to location intelligence capabilities to GA staff across the country.

A client of ESRI Australia for approximately 15 years, GA will use the agreement to maximise its return on investment in Geographic Information Systems (GIS) by delivering location intelligence capabilities across the organisation.

The agreement will allow GA to extend the organisation's existing GIS applications, and create new applications to support its key responsibilities including managing Australia's national topographic and geoscientific data, delivering digital products and geoscience based research.

"We are delighted to support Geoscience Australia with this new agreement," said Brett Bundock, ESRI Australia's Managing Director. "This ELA will enable GA to extend the benefits of location intelligence across the organisation, and will ensure that GIS remains a strategic asset for GA."
