Tell us what you think...

ESRI Australia is trialling a series of one day courses. The courses will be run in Adelaide and are designed to help our clients improve their skills and practical application of knowledge without taking extensive time away from the office.

Special Training Event

Do you work in Mining? [Introduction to ArcGIS Desktop for Mining Geoscience](#) is a course designed specifically for geoscientists working in the mining industry.

This course will be hosted by Willy Lynch from ESRI and introduces the ArcGIS tools used to accomplish mining geoscience workflows.

Scheduled: Perth 16-18 November 2009

[Register now](#)

Topics covered at this course:

- // Detecting mineral occurrence patterns
- // Locating prospective deposits
- // Identifying optimal areas for mineral exploration
- // Working with anomalous geochemical samples
- // Symbolising geology, faults, fold axes and structural measurements
- // Exploring spatial relationships

More about Willy Lynch

Willy is a professional Geologist with more than 25 years of worldwide GIS and geotechnical project experience. Willy is currently the Mining Industry Specialist for ESRI based at the ESRI-Denver Regional Office.

TOP TIP

Sometimes business workflows demand that you temporarily shutdown ArcGIS Server services and then restart them when some process has completed. How can you stop and then restart an ArcGIS Server Map service within a batch process?

[Find out more](#)

▶ Growing Expectations...

Consumer mapping sites have raised the expectations of what end users require from maps delivered over the internet.

A one-size fits all web map will not suffice and consumers are not afraid to assess and compare elements of usability, efficiency and delivery when looking at your map.

So what are the golden rules to creating great web maps and what measures should you use to evaluate the quality of your web map?

▶ Book of the month

Research & Theory in Advancing Spatial Data Infrastructure Concepts

Harlan Onsrud

In this scholarly volume, Harlan Onsrud, former president of the Global Spatial Data Infrastructure Association, presents the latest research by renowned international experts.

This book analyses models for planning, financing, and implementing SDI initiatives and assesses the extent to which established SDI projects in Australia, India, and the European Union are contributing to national economic competitiveness and social well-being.
